

abstract leap

Software Engineer

£35-65k + bonus + pension

Apply with your CV to hello@abstractleap.com

At Abstract Leap, you'll work across a diverse range of client projects—building bespoke software solutions and enhancing our own suite of products. We specialise in creating systems that empower businesses, rather than constrain them. Designed for the web and hosted in the cloud, our platforms combine user-centric design, intelligent automation, data analytics, and AI to drive efficiency and deliver transformative services.

As a growing company, we're looking for talented developers who want to play a foundational role in shaping our future. You'll be trusted with delivering complete user stories—from gathering requirements to deployment and testing—supported by experienced lead developers who will help you learn and thrive.

You'll write clean, maintainable code using modern tools and frameworks, apply agile development practices, and contribute to evolving codebases. As you grow, so will your responsibilities—with the flexibility to shape your role around your strengths and interests.

About you

- Proficiency in Computer Science principles and software development practices
- Experience in full-stack web development, preferably ASP.Net and C#
- Strong problem-solving abilities and attention to detail
- Effective communication and collaboration skills

Benefits

Competitive salary and performance related bonus.

- Juniors up to £45k base
- Mid-level up to £55k base
- Senior level up to £65k base

Other:

- Pension
- 25 days (+ bank holidays) paid holiday
- Great hardware and software
- Access to Perkbox (perks, discounts, freebies)
- Flexible/hybrid working
